PROFESSIONAL SUMMARY

Motivated computer engineering student (8th semester) with a minor in AI & ML, currently gaining hands-on production experience as a Full Stack Developer. Skilled at building robust frontend interfaces and backend systems. Proven ability to excel in both team-oriented and independent environments with strong organizational skills.

EDUCATION

L.D. College of Engineering

2022 – 2026

Bachelor of Engineering – Computer Engineering | Current CPI: 8.67

EXPERIENCE

VasyERP | Full Stack Developer – React + Spring Boot

Jan 2026 – Present

- Built and shipped production-level frontend pages using React, contributing to core modules of the ERP system.
- Developed a backend image migration service using Java multithreading, enabling efficient bulk processing of large image datasets.
- Collaborated with the engineering team to ensure scalable, maintainable code aligned with production standards.

TECHNICAL SKILLS

Languages & Runtime: JavaScript, C, Java, HTML, CSS, Node.js

Frameworks & Libraries: React.js, Express.js, Next.js, Spring Boot

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Postman

Deployment & Hosting: Vercel, Render

Authentication & Security: JWT, Passport.js, Bcrypt, CORS

PROJECTS

MealMate – Homemade Tiffin Platform

Jan 2025 – May 2025

- Full-stack MERN application connecting local tiffin providers and customers with role-based dashboards (Admin, Provider, Customer).
- Enables order management, provider listings, and meal tracking.
- Tech Stack: MongoDB, Express.js, Next.js, Node.js, JWT
- [GitHub](#) | [Live Demo](#)

Nexora – E-Commerce Platform

Jan 2026 – Mar 2026

- Full-stack application with role-based dashboards (Admin, Customer) supporting order management, inventory/stock tracking, and Stripe payment gateway integration.
- Tech Stack: Spring Boot, React, PostgreSQL, Stripe
- [Github](#)

Nevexa – Social Media Platform

Jun 2025 – Sep 2025

- Scalable full-stack platform for real-time chatting and post creation with AI-generated captions, user search, and secure interactions.
- Designed for a dynamic user experience with a scalable backend architecture.
- Tech Stack: Node.js, Express.js, MongoDB, Mongoose, Next.js
- [GitHub](#) | [Live Demo](#)
